

Internet Explorer 7 & 8

It has come to our attention that some of our members are having a issue when they visit private sites (Liberty Board is a private site). We have found that the best way to correct this is to add the site to your trusted sites on your Internet Explorer Browser.

To add a site as a trusted site follow the steps below.

Right click on your Internet Explorer Icon on the desktop

1. Open a Internet Explorer Browser
2. Select Tools then Internet Options
3. Click on the Security Tab
4. Make sure the Trusted Sites Icon is selected
5. Click on the Sites button
6. Enter the web site you are making a trusted site (ex: *.njtaxrecords.com) & click ADD. Do not type www.njtaxrecords.com, copy and paste *.njtaxrecords.com
7. Close out all the windows

This should fix whatever issues that you may have viewing or accessing a private sites.

If you continue to have a problem with the Liberty site & need assistance please contact Alida at the board office 201-867-1874.
